## **INTRODUCTION**

The aim of Regulation (EC) No 765/2008 is to ensure that products benefiting from the free movement of goods within the Community fulfil requirements providing a high level of protection of public interest such as health and safety in general, health and safety at the workplace, protection of consumers, protection of the environment and security, while ensuring that the free movement of products is not restricted to any extent greater than that which is allowed under Community harmonisation legislation or any other relevant Community rules.

In order to reach these objectives, it was necessary to establish an overall framework of rules and principles in relation to accreditation, conformity assessment and market surveillance.

Regulation (EC) No 765/2008 provides a comprehensive framework for accreditation and to lay down at Community level the principles for its operation and organization.

The particular value of accreditation lies in the fact that it provides an authoritative statement of the technical competence of bodies whose task is to ensure conformity with the applicable requirements providing a high level of protection of public interest.

Moreover, transparent accreditation, as provided for in Regulation (EC) No 765/2008, should be considered by the national public authorities as the preferred means of demonstrating the technical competence of conformity assessment bodies (CABs).

Due to the new accreditation system set out in Regulation (EC) No 765/2008, the number of European legislations with reference to accreditation and conformity assessment has been increased significantly.

Accreditation is not only the preferred means to demonstrate the competence of CABs in regard to the EU Product legislations, it is used also in many other regulated sectors such as environment, climate, food and feed, transport, data protection and cybersecurity.

All EU legislations are published in the Official Journal of the EU (OJEU), but there is no specific list of legislations which make use of accreditation and/or conformity assessment. Only the New Approach Notified and Designated Organisations (NANDO) Information System includes a list of product legislations (Union Harmonisation Legislations) relevant for so-called notified bodies (see <https://ec.europa.eu/growth/tools-databases/nando/>). In NANDO and on the EU Commissions' website you can find also the legislations and other relevant documents for the assessment of notified bodies.

In order to support the NABs, this document with the comprehensive directory of EU legislations and schemes with relation to accreditation and conformity assessment according to Regulation (EC) No 765/2008 has been established.

We do not claim that this directory includes all EU legislations and schemes. In case that an EU legislation, which includes provisions to accreditation and conformity assessment according to Regulation (EC) No 765/2008, is missing, please inform the Secretariat.

The directory provides the information, whether accreditation is defined in the specific legislation as mandatory or voluntary (if applicable). But even if accreditation is not defined by the European regulator as mandatory, the national regulator can make the use of accreditation mandatory.

Note: The legislations can be found by search on EUR-Lex.
